Web Technologies: HTML5, CSS3, React.js, Tailwind CSS

Tools & Platforms: Git, GitHub, VS Code, MySQL, Linux (Basic)

Concepts: OOPS, Data Structures, RDBMS, Networking Fundamentals

PROJECTS

Cab Booking System (Backend) | *Node.js, Express, MongoDB*

Oct 2025

- Developed the server-side logic for a mobile cab booking application.
- Implemented RESTful APIs to handle user requests, including ride booking and fare calculation.
- Optimized database queries in MongoDB to ensure fast data retrieval for ride history.

Cab Booking Application (Group Project) | *Flutter, Node.js, SQL*

Nov 2025

- Collaborated with a team of 4 to build a complete cab booking system prototype.
- **My Role:** Designed and implemented the mobile UI using Flutter widgets and state management.
- Integrated the frontend with the backend APIs and managed the project repository on GitHub.

LEADERSHIP & EXTRACURRICULARS

Smart India Hackathon

Participant

University Level

2025

- Participated in the internal university round for the Smart India Hackathon.
- Worked in a team environment to brainstorm solutions for real-world problem statements.

CERTIFICATIONS

Currently pursuing certifications in Full Stack Development and Cloud Computing.
